

Roving the Red Planet!

Mars K-12 Florida Educator Workshop

at the

Kennedy Space Center

June 4, 2003

Sponsored by: NASA, The Kennedy Space Center, The Jet Propulsion Laboratory, Cornell University, and Arizona State University

Prepare for the next Mars rover missions! This workshop will help you get your students ready and excited for the next robotic adventures on Mars! Come for a fun-filled two days of fantastic, understandable Mars science, Standards-based hands-on activities, lots of classroom resource materials, and upcoming teacher and student opportunities. Two missions to Mars are launching this summer from Florida. Meet the real project people and get the "behind the scene" stories about these fantastic rover missions that will be landing in January 2004. You won't want to miss this workshop!

Special Guest Speakers will include members of the Mars Exploration Rover team, Mars program scientists and engineers from NASA Headquarters, and other members of the Mars community.

Space is limited so sign up early!
